

PORTFOLIO OBJECTIVE

This model comprises solely passive investment vehicles (such as unit trusts and exchange traded funds) that simply track a market and aim to deliver returns reflective of how that market is performing. Asset classes you could find in this portfolio are government bonds, corporate bonds, alternatives and cash. Property and exchange traded commodities may all feature within the alternatives classification.

The portfolio seeks to generate strong capital growth over the long term (7 years or more) and can experience potentially frequent and high levels of volatility. Portfolios will typically comprise 90% equity and 10% non-equity, though weightings may deviate within set parameters, allowing managers to react to market conditions.
