

### PORTFOLIO OBJECTIVE

This model comprises solely passive investment vehicles (such as unit trusts and exchange traded funds) that simply track a market and aim to deliver returns reflective of how that market is performing. Asset classes you could find in this portfolio are government bonds, corporate bonds, alternatives and cash. Property and exchange traded commodities may all feature within the alternatives classification.

The portfolio seeks to generate modest capital growth higher than bond based returns over the short to medium term (3 - 5 years or more) by employing a cautious investment strategy. Portfolios will typically comprise 30% equity and 70% non-equity, though weightings may deviate within set parameters, allowing our managers to react to market conditions.
