

PORTFOLIO OBJECTIVE

This model comprises solely passive investment vehicles (such as unit trusts and exchange traded funds) that simply track a market and aim to deliver returns reflective of how that market is performing. Asset classes you could find in this portfolio are government bonds, corporate bonds, alternatives and cash. Property and exchange traded commodities may all feature within the alternatives classification.

The portfolio seeks to generate capital growth over the medium term (5 years or more), with the aim of riding out short-term fluctuations in value. Portfolios will typically comprise 50% equity and 50% non-equity, though weightings may deviate within set parameters, allowing managers to react to market conditions.
